# Accessibility

These checks highlight opportunities to [improve the accessibility of your web app](#). Automatic detection can only detect a subset of issues and does not guarantee the accessibility of your web app, so [manual testing](#) is also encouraged.

### NAMES AND LABELS

⚠     Buttons do not have an accessible name                                            ⌄

These are opportunities to improve the semantics of the controls in your application. This may enhance the experience for users of assistive technology, like a screen reader.

### ADDITIONAL ITEMS TO MANUALLY CHECK (10)                                          Show

These items address areas which an automated testing tool cannot cover. Learn more in our guide on [conducting an accessibility review](#).

PASSED AUDITS (23)                                                                   Show

NOT APPLICABLE (33)                                                                  Show

# Best Practices

### GENERAL

⚠     Uses deprecated APIs   — 1 warning found                                          ⌄

## TRUST AND SAFETY

○   Ensure CSP is effective against XSS attacks                                    ⌄

○   Ensure proper origin isolation with COOP                                       ⌄

○   Mitigate clickjacking with XFO or CSP                                          ⌄

**PASSED AUDITS** (13)                                                          Show

**NOT APPLICABLE** (4)                                                          Show
