# Accessibility

These checks highlight opportunities to [improve the accessibility of your web app](#). Automatic detection can only detect a subset of issues and does not guarantee the accessibility of your web app, so [manual testing](#) is also encouraged.

**NAMES AND LABELS**

| ▲   Buttons do not have an accessible name | ⌄ |

These are opportunities to improve the semantics of the controls in your application. This may enhance the experience for users of assistive technology, like a screen reader.

**ADDITIONAL ITEMS TO MANUALLY CHECK** (10)                Show

These items address areas which an automated testing tool cannot cover. Learn more in our guide on [conducting an accessibility review](#).

**PASSED AUDITS** (23)                                      Show

**NOT APPLICABLE** (33)                                     Show

## 59

# Best Practices

## TRUST AND SAFETY

▲  Does not use HTTPS  — 1 insecure request found                                    ⌄

◯  Ensure CSP is effective against XSS attacks                                        ⌄

◯  Use a strong HSTS policy                                                           ⌄

◯  Ensure proper origin isolation with COOP                                           ⌄

◯  Mitigate clickjacking with XFO or CSP                                              ⌄

## GENERAL

▲  Uses deprecated APIs  — 1 warning found                                            ⌄

▲  Browser errors were logged to the console                                          ⌄

▲  Missing source maps for large first-party JavaScript                               ⌄

### PASSED AUDITS (10)                                                          Show

### NOT APPLICABLE (3)                                                          Show
